

Environmental Footprint

Minimizing our environmental footprint is a priority as we produce this annual report.

The report is printed on Neenah Classic Crest paper, which is Forest Stewardship Council certified. The paper is manufactured using 100 percent certified renewable energy, and certified Carbon Neutral Plus through investments in energy conservation and renewable resources by Neenah Paper, which is a member of the Climate Registry.

The soy-based and vegetable oil-based inks used to print this report are 91 percent free of volatile organic compounds.

The printer, University Lithoprinters, is a Michigan member of the Great Printer Project, a national, cooperative effort to make pollution prevention a standard practice in the lithographic printing industry. It is a chain-of-custody certified printer by the Forest Stewardship Council.™
